

## SUGGESTED APPLICATION AND PROTOCOL

**\*\* Your Protocol and Application practice may vary based on your plant condition \*\***

We strongly suggest a **cocktail application** for best results. Standalone application is on a case by case basis and consulting with Organnabis Technical Advisor (OTA) is recommended.

### PREVENTATIVE MAINTENANCE

**Dilution Rate:** 1 ½ oz. Buddapest + ½ oz. pHlourish + 1 Gal. Water (Temperature not below 65 deg F)

**Frequency:** Once a week, preferably scheduled routinely on the same days each week.

**Application Method:** Apply using atomizer, misting system or other spraying apparatus. Make sure that leaves are fully wet including the underside.

**INDOOR:** Apply at end of light cycle or by simply turning lights off. Wait until leaves are dry before turning lights on.

**OUTDOOR:** Dusk or Dawn (preferred). Avoid applying under direct light (This includes sunshine).

### INFESTATIONS

**Dilution Rate:** 2 oz. Buddapest + ¼ oz. pHlourish + 1 Gal. Water (Temperature not below 65 deg F)

**Occasional Severe:** 3.5 oz. Buddapest + ¾ oz. pHlourish + 1 Gal. Water

**Note:** Higher concentration rates may be called for to treat severe infestation. However, no higher than 4oz./gal for Buddapest and no higher than 1oz/gal for pHlourish to avoid possible phytotoxicity.

**Frequency:** Every other day up to 3 times a week (Consult Organnabis before adding more days).

**Application Method:** Apply using atomizer, misting system or other spraying apparatus. Make sure that leaves are fully wet including the underside.

**INDOOR:** Apply at end of light cycle or by simply turning lights off. Wait until leaves are dry before turning lights on.

**OUTDOOR:** Dusk or Dawn (preferred). Avoid applying under direct light (This includes sunshine).

### **\*\* IMPORTANT \*\***

**Shake the bottles of Buddapest and pHlourish very well before diluting with water and again before each application. Water temp not below 65 deg F.**
