

**pHlourish is an organic based foliar blend for Marijuana and Hemp farming (Cannabis). It is a nutri-chemical breakthrough input and is considered as a foliar fertilizer because of its known and yield enhancing effects.**

pHlourish is a COMPLETE FOOD for Cannabis that is absorbed through the leaves. pHlourish is formulated from VEGETABLE, HERB & FRUIT TREES.

#### USES and BENEFITS:

100% NATURAL ORGANIC FOLIAR BLEND with vitamins, Micro-Macro Nutrients, Polysaccharides, Amino Acids and Chrysophanic Acid.

#### BIOTIC PROPERTY

Due to presence of elements called lignin and saponin found in Agrapol.

#### STICKER PROPERTY

Rain fastness pHlourish is easily absorbed by the foliage.

#### SYSTEMIC PROPERTY

pHlourish components penetrate in the leaves through the stomata and are transported to the plants system up to the roots.

#### GROWTH STIMULANT

Presence of vitamins and minerals that help the plants grow due to the activation of growth hormones.

#### ROOT HORMONE

pHlourish has vitamins and minerals that help the plant consistently produce new roots.

#### SYSTEMIC ACQUIRED RESISTANCE (S.A.R.)

Polysaccharides, minerals, vitamins, and other secondary metabolites present in pHlourish makes the plant healthy and strong to resist abiotic and biotic stresses.

#### LEAF CLEANER

The presence of D-limonene acts as a cleaner making the fruit free from blemishes. It washes impurities from the leaves that assures 100% photosynthesis in the plant.

#### OTHER ADVANTAGES:

Increase of crop yield or bud size, environmentally friendly, 100% Biodegradable/Healthy.

More acre/hectare coverage per bottle which makes it very economical (Contact Us for detailed information and recommendation for your grow).

Definitely, chemical fertilizers alone cannot maintain and ecologically balanced soil, but overall components of pHlourish can help make the plants healthy and ecologically balanced.
